

Magnetic Declination of the United States

12

Name _____ Date _____

Magnetic Declination of the United States

1. Why is mapping magnetic declination necessary?
2. In what part of North America is the magnetic declination greatest?
3. What is the southernmost state in which there is no difference in the angle between geographic north and geomagnetic north?
4. If you have a compass and know the angle of declination for your location, what information can you determine?
